

Vision in Motion

Centre Pier

What is happening on the Centre Pier?

Port Hope's Centre Pier is located on the harbour near the conversion facility and for many years it has been used as a temporary storage site for legacy waste Cameco inherited from previous operations. To address the waste, the Port Hope Area Initiative (PHAI) is constructing a Long Term Waste Management Facility (LTWMF) located in the Municipality of Port Hope just south of Highway 401. The planned activities on the Centre Pier include the removal of all waste, existing buildings and the temporary storage mound.

In 2015, VIM activities began and two small buildings on the pier were removed. The drummed waste stored in buildings 43 and 40, were repackaged and transported to the LTWMF.

Once all of these activities are completed the land will be available to the Municipality of Port Hope for development.

Once Vision in Motion and Port Hope Area Initiative activities on the Centre Pier are completed, the land will be available to the Municipality of Port Hope for development.
